Capability Development Pathway using AI Event Report (2025-26)

Name of the Department	Bachelor of Business Administration
Name of the Event	Capability Development Pathway using AI
Date of the Event	2 April 2026
Name of the Event Co-ordinator	Prof. Sagar Hulbatte
Duration	1 Day
No. of Students	130
No. of Staff	1
Objective	The primary objective of the session by Shrainik Parmar, Founder & CEO of DeegreeLabs, was to equip students with a structured understanding of capability development in the context of Artificial Intelligence (AI). The session aimed to bridge the gap between academic learning and industry expectations by highlighting the relevance of AI-driven skills in the modern business environment. It focused on enhancing student awareness of emerging digital trends, fostering analytical thinking, and encouraging the adoption of AI tools for improved decision-making and productivity.
Outcome	The session resulted in increased awareness among students regarding the importance of AI in shaping contemporary business practices. Participants gained clarity on the essential competencies required to stay relevant in a rapidly evolving digital landscape. The interaction enabled students to understand practical applications of AI in business functions such as marketing, operations, and analytics. Furthermore, it motivated students to proactively upskill and align their career pathways with industry demands, thereby strengthening their employability and adaptability.

Write-up for Session on AI for Capability Development

A session on "Capability Development Pathway using AI" was conducted by Shrainik Parmar, Founder & CEO of DeegreeLabs, for the students. The session provided valuable insights into how Artificial Intelligence is transforming the business ecosystem and redefining the skills required for future professionals.

The speaker elaborated on the concept of capability development, emphasizing the need for continuous learning and adaptability in an AI-driven world. He discussed various AI tools and their practical applications across different business domains, illustrating how organizations leverage AI for data-driven decision-making, automation, and strategic growth.

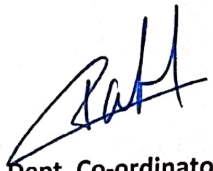

The session also highlighted the importance of building a strong digital foundation, including analytical skills, technological proficiency, and problem-solving abilities. Real-world examples and industry perspectives shared during the session helped students connect theoretical knowledge with practical implementation.

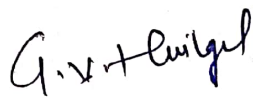

Overall, the session was highly informative and engaging, providing students with a clear roadmap for developing relevant skills and preparing themselves for the evolving digital business landscape.
